

Golden Scratcher™ — v1.0 Mechanical Specification

Reverse-engineered benchmark specification based on physical measurement and functional performance analysis.

Overall Dimensions

Overall Length	13.5 in
Effective Working Length	~11 in
Total Weight Target	Medium (hand-balanced, no head-heavy bias)

Head / Bowl Geometry

Bowl Diameter	3.5 in
Head Base Depth (table → base)	~2.9 in
Total Head Envelope (table → top)	~3.9–4.0 in
Effective Scratch Reach (tines)	~2.1–2.2 in

Arc & Curvature

- Continuous, progressive single-dominant arc
- Approximate effective radius: ~6 inches
- No hinge bends, no flat segments
- Arc begins early in handle; tines complete the curve

Materials & Finish

- Spring steel or equivalent elastic stainless steel
- Rounded tine ends (non-sharp, non-stabbing)
- Satin or lightly polished finish (low drag, easy cleaning)

Functional Intent

- Wrist-neutral at working pressure
- Progressive pressure increase (no pressure cliffs)
- Wide contact patch before tine engagement
- Designed for control, not aggression
